DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3-4, 14-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

With regards to claims 3, 14 applicant claims calculating a load level as a function of at least one of a change in measured power and change in number of users. Hence if the calculated load level is based on just a change in measured power (or just a change in number of users not both), it is not clear how the load level calculation is derived from an estimated load level which is both a function of a change in power and a change in number of users.

Allowable Subject Matter

Claims 2, 5-11, 13, 16-27 allowed.
